

# EarHugs

The Ideal Sound Coupler for Newborn Hearing Screening & Diagnostics

## The Superior Coupler

- Its large adhesive surface keeps the EarHug from detaching during screening, even if the baby moves a lot.
- Attaches securely even to babies with hair.
- Gentle adhesive for easy and discomfort-free removal.
- Comfortable design allows the baby to easily fall asleep even while lying on the EarHug.
- Extremely flexible material conforms to different head shapes.
- Easily couples to insert earphone sound tube using an EarHug Adapter.
- Cost-effective.
- Biocompatible, non-sterile, single patient use.

Made in the U.S.A. FDA clearance number K073384.

For use with Intelligent Hearing Systems equipment only.
